

Emergent Technologies, Inc. Expands Portfolio Company Support Team

Damon Borich, M.D. responsible for Business Development for Beacon Sciences, LLC.

Austin, TX, September 4, 2007- Emergent Technologies, Inc., a unique life sciences venture firm, recently hired Damon Borich, M.D. as Senior Vice President & Chief Medical Officer. Dr. Borich will be responsible for executive business development aspects of Beacon Sciences, LLC and other Emergent Technologies portfolio companies.

“Dr. Borich comes to us with a background in clinical diagnostics, as well as in assay technology for biowarfare, environment and food safety,” said Tommy Harlan, President and CEO. “We are excited to have him join our diverse team of technical and business professionals. His extensive background will provide valuable business support in his new role.”

Dr. Borich is a licensed physician and received his Medical Doctorate degree from Baylor College of Medicine in Houston. Dr. Borich previously served as the Chief Medical Officer of a Venture backed point-of-care diagnostics company and is the founder of Detekt Biomedical L.L.C., a developer of handheld diagnostic instrumentation.

About Emergent Technologies, Inc.

Emergent Technologies Inc. (ETI), founded in 1989 by Thomas A. Harlan, is a unique life sciences venture firm that forms and manages companies and funds that commercialize groundbreaking institutional and university-based technologies.
